

ALA 2024 – Robert Frost Society

On this panel, we will reflect on Frost's national and international engagements and profile in his later years (1940s-1960s). Papers may examine: Frost's attention to national political and social issues in his poetry, prose, and lectures; his evolution as a public intellectual in the US; his trips abroad as "poet-statesman"; translations of his work into non-English languages.
